Follow the adventures of High Octane as he makes his way to become a beloved superhero!

DESCRIPTION:

High Octane is a physics-based action platformer with randomized stages and replayability at its core. Featuring comic book-style visuals and a neon colour palette, the game is quirky, charming, and filled with a plethora of costumes to personalize your hero while fighting crime.

It's quick to get into, fresh with each engagement, and allows players to develop real skill as they master Ollie's movement and maneuverability with growing confidence and precision.

Unlock Gameplay Modes

Modify how you play and discover four different gameplay modes that you can toggle on or off. Collect coins, save squids, defeat enemies, and make deliveries to give you bonuses on your runs.

Want to play more casually? Only turn on the modes you like and then hit the town!

Style Your Cephalopod

Collect outfits and style Ollie your way as he tries to navigate the harsh, unforgiving world of Superhero Fashion!

Share Your Swinging Style

Threaded the needle of certain death? Did a sick loop-de-loop? Failed to save the day in a catastrophic manner? Show off your skills (or lack thereof) and share your runs with the built-in replay feature! The only thing better than saving the day in style is showing it off!"

Be The Best Hero You Can Be

Track stats on your crime-fighting runs! Keep at it and try to beat your previous bests!

ABOUT ZEMIND:

ZeMind Studios is a team of innovative and skilled professionals with expertise in native app development, games, immersive experiences, web development, and real-time development. Our passion for technology and creative problem solving drives us to continuously push the boundaries of what's possible in our fully digital world.
